The disclosure is objected to because of the following informalities: the Serial Numbers of the copending applications have not been set forth on pages 12 and 18 of the specification.

Appropriate correction is required.

Claim 70 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The terminology "a ratio of multimer to monomer of at least 4.75:1" (claim 70) is not disclosed or suggested by the specification as originally filed.

Claims 72-73 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 72 and 73 are substantial duplicates.

Claims 67-71 and 74-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malabarba et al (U.S. Patent No. 5,750,509) for the reasons set forth in the Office Action of August 31, 2005.

Applicant's arguments filed November 28, 2005 have been fully considered but they are not persuasive.

In response to applicant's argument that lactose and sorbitol are listed as conventional excipients, the fact that applicant has recognized another advantage which

would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Applicant further contends that Malabarba et al do not disclose the claimed pH. However, note that the instant claims are directed to a dry composition which have a pH only when reconstituted. Therefore, the claimed compositions are still deemed prima facie obvious over Malabarba et al.

Claims 79-81 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
